About Me

I am a Computer Science and Engineering undergraduate with foundational knowledge of programming and core computer science concepts. I am interested in developing analytical and programming skills through practical learning and collaborative environments.

Skills

- **Programming Languages:** C, C++, Python (Basics)
- **Python Libraries:** Pandas, NumPy, Matplotlib
- **Database:** SQL – basic database querying and data retrieval
- **Web Development:** HTML, CSS (basic webpage structure and layout)
- **Core Computer Science Concepts:** Data Structures, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks

Projects

- Solar System Simulation (Computer Graphics)
 - Built a basic solar system simulation using C/C++
 - Implemented circular motion of planets using sine and cosine functions
 - Added features like zoom, movement controls, asteroid belt and comet animation
 - GitHub: <https://github.com/swadhashubhangi/solar-system-simulation-cg>

Experience

- Participated in the NASA International Asteroid Search Campaign (IASC), analyzing astronomical image data to assist in identifying potential asteroid objects

Activities

- Participated in college cultural and music-related activities, contributing to collaborative performances in university cultural events

Education

Qualification	University/School	Graduating Year	Percentage/GPA
B. Tech CSE	Amity University Rajasthan, Jaipur	2028	7.92
12th	Asian World School, Jaipur	2024	70.2
10th	Asian World School, Jaipur	2022	87
